

# Delphi Standard Steering Column

### ► Description

Delphi's fixed-position Standard Steering Column is the foundation of its industry-leading column line. As a supplier of over 100 million columns to vehicle manufacturers around the world, Delphi offers exceptional versatility, reliability, and engineering support. Manufacturers can select from a broad range of existing columns or request custom product engineering assistance.

### ► Benefits

- Energy absorbing for enhanced crashworthiness
- Custom selection of energy-absorbing load, distance, and dynamics
- Floor or column placement of transmission shift control
- Integration capability for switches and control functions
- Requires brakes to be applied before shifting out of park
- Column airbag system for supplemental driver crash protection
- Mechanical/electronic vehicle anti-theft systems
- Can be modified for various vehicle manufacturer requirements such as installed dimensions, mounting system, control placement, and other operating standards
